

The Brand New Exclusive Range of Enviro Flame Bio Ethanol Fires is here!

Ranging from 8 cassette options, readymade hole in the wall fireplaces and traditional basket fires. We even have bio ethanol fires especially designed for traditional tiled and arched inserts.

Our unique flame level system means that regardless of what setting you have the fire on, there is still plenty of fire to look at, instead of dropping the flames low, they centre towards the middle of the burner much in the same way as premium gas fire manufacturers have started to do.

The option to add logs is also a unique feature, no other premium bio ethanol manufacturer allow this. Our burners have been made with this in mind to enable the end user to have total

flexibility to have a beautiful full log effect on their fire, or to just have a simple contemporary linear flame effect.

Our automatic fuel filling system is totally built into the fire, meaning no clunky fillers to take out and hide away when it comes time to refill. Simply use the small hose supplied to connect to the fire and into the fuel, press a button on the fire and leave to fill. When the fire is full it will turn off, then you can remove the hose and away you go.

With the WIFI upgrade, you can control your Enviro Flame BIO fire using your smart phone, tablet, smart home system and even Alexa or Google voice control! It also comes with remote control as standard and if you lose this don't worry, there is also manual control built in!

STANDARD FEATURES INCLUDE: • Fully Remote and Manual Control • 4 Flame Settings • Heat, Oxygen and Spill sensors
• Fully Automatic Fuel Filling Built In • Brushed Stainless Steel Top as Standard • 5 Year warranty

CASSETTE RANGE

Model No.	Burner Size	Flame Length	Fuel Capacity	Max Burn Time	Heat Output	Min Hole for Burner
Bio 450CAS Smart Fire	457L x 193W x 168H	329mm	3lt	6 hours	2.6-3.3kW	453L x 180W x 250H
