# *Welcome to the world of*

# Solid Fuel

A beautiful range of fireplaces designed and made especially for solid fuel.

Stone, Marble, Timber and Continental designs are made in our Bristol factory (no imports) by our own highly skilled artisans.

Marble, Limestone and Timber have porcelain tiled middles and hearths and are slabbed using special lightweight heat resistant materials. They are suitable for all solid fuel appliances. For Open Coal Fires there is a choice of 16" or 18" stainless steel, brass or black fire frames and hearth plates.

Our Cast Sandstone surrounds including the continental designs are also suitable for all types of solid fuel appliances including 16" or 18" Open Fires. The Continental Range is available in either all stone or with a slabbed tiled back panel and hearth.
